

Part number: SMC000237 - Model: SMC-12L BS

TECHNICAL CHARACTERISTICS	
Max. switching voltage:	230 Vac/dc
Max switching current:	3:00 AM
Max. switching power:	60 W/VA
Max. switching frequency:	230 Hz
Contact type:	Bistable reed
Contact actuation time:	2.5 mSec
Repeatability (%Sn):	± 0.3
Temperature limits:	-25 ÷ +80 °C
IP rating:	IP 67
Connection type:	Cable 2 m
Housing material:	Nickelled brass
Mechanical characteristics:	M12x1
Cable type:	2x0.50 PVC
Weight:	130 g

Part number: SMC000237 - Model: SMC-12L BS

INSTRUCTIONS FOR CORRECT INSTALLATION

SENSING DISTANCE WITH MAGNET M-20

DEACTIVATED BY THE SOUTH POLARITY

ACTIVATED BY THE NORTH POLARITY

SWITCHING POWER DIAGRAMS

Voltage (V), switching current (I) and max. power (P) mean the max. switching instantaneous value in presence of loads.

When choosing a type of contact it is recommended that the following formula be applied: $P = V \times I$.

For magnetic sensors which have different technical data from shown standard ones and for the switching of inductive or capacitive loads our technical department is always at your disposal.

SENSORS AND MAGNETS SENSING DISTANCE

SENSOR	REED	M-20	M-30
SMC-12L BS	BISTABLE	20	40
SMC/P-12L BS	BISTABLE	20	40
SMC-12LM BS	BISTABLE	25	50
SMC/P-12LM BS	BISTABLE	25	50

Data shown on the above table have an approximate value, referred to applications which are not ferromagnetic and with magnet for frontal working. In case of setting-up on ferrous surfaces which scatter the magnetic flux, it is necessary to interpose spacers made of non-magnetic material.
