

MBA 258050
Article No. 0101101400

Material: Aluminium
Protection class: IP66

MBA-Enclosures are universal, sturdy and easily adapt to the installation of electrical, electronic and pneumatic components. Manufacturing takes place using pressure die casting or gravity die casting methods.

MBA-Enclosures can be mechanically processed in a number of ways providing almost no limits to customised surface design.

As terminal enclosures they can be assembled according to a modular system with the addition of differing clamps and cable glands. In the measurement and control technology market they are often used for encapsulating sensors. Additionally they serve as junction boxes for cables and lines or take on the job of protecting highly sensitive electronics against water, dirt and dust.

Material information

Material cover	Aluminium
Material base	Aluminium
Material sealing	Polyurethane
Material screws	Stainless Steel V2 A
Silicone-free	✓
Halogen-free	✓
UV-resistant	✓
Surface coating	Powder coating

Temperature resistance and application areas

Permanent operating temperature max. (°C)	100
Permanent operating temperature min. (°C)	-40
Permanent operating temperature with special sealing max. (°C)	140
Permanent operating temperature with special sealing min. (°C)	-50
Suitable for outdoor use	✓
Suitable for indoor use	✓

Technical specifications

Protection class IP	66
Norm of protection class	DIN EN 60529
Earthing point available	✓
Sealing foamed seamless	✓
Captive cover screws	✓
Assembly tool	PZ2
Tightening torque cover screws max. (Nm)	3.00
Tightening torque cover screws min. (Nm)	1.50
Tightening torque earthing screw max. (Nm)	2.30
Tightening torque earthing screw min. (Nm)	1.20

Modifications and Services

Mechanical processing	✓
Finishing and Assembly	✓
Surface design	✓
Special colours	✓
